

Quartzheat...Instant heat.

Where and when you want it!

You are sitting outside entertaining a few friends on a warm summer's evening when the sun starts to set, and a chill creeps in.

Everyone drifts off somewhere else for warmth. Wouldn't it be a pleasant change if you could sit outside all evening as you might when its a warm sunny day?

Algarve quartz outdoor heaters only warm people and objects and not the air in between, making them ideal for drafty areas and external use.
